## EDUCATION

---

- **Oregon State University**  
*Bachelor of Science in Computer Science*

Corvallis, OR  
Sept. 2019 – Mar. 2024

## EXPERIENCE

---

- **Blue Cross of Idaho (via In Time Tec)** Los Angeles, CA  
*Full Stack Engineer* Oct. 2024 - Present
  - **Cloud-Native API Architecture at Scale:** Designed and deployed high-availability RESTful APIs on AWS (Lambda, API Gateway, RDS, S3, CloudWatch) with OAuth2.0 authentication and circuit breaker patterns, serving thousands of concurrent users across HIPAA-compliant patient data systems while maintaining 99.9% uptime through automated monitoring and alerting.
  - **Event-Driven Data Processing Pipeline:** Engineered asynchronous HL7 FHIR-compliant data transformation services using AWS Lambda and SQS for real-time healthcare data exchange across distributed systems, implementing comprehensive data validation, dead-letter queue retry mechanisms, and CloudWatch dashboards reducing incident response time by 40%.
  - **Large-Scale Data Migration & Operations:** Owned end-to-end ETL pipeline migrating 10M+ patient records from on-premises databases to AWS cloud using Glue and Database Migration Service, implementing Change Data Capture (CDC) for real-time synchronization with zero production downtime and automated data integrity validation.
- **OSU Center for Applied Systems and Software** Corvallis, OR  
*Software Developer* Feb. 2022 - July 2024
  - **Event-Driven Microservices Migration:** Led enterprise-scale decomposition of monolithic system into event-driven microservices architecture using .NET Core, designing asynchronous messaging patterns with ActiveMQ broker and API gateway orchestration, reducing deployment cycles by 60% and enabling independent horizontal scaling across 8+ services.
  - **Internal Tooling & Full-Stack Development:** Built internal web applications and admin tools for operations teams using Vue.js 3 with TypeScript, developed RESTful backend services with comprehensive test suites and CI/CD pipelines, delivering features on tight schedules while enforcing code quality through systematic code reviews and documentation.

## PROJECTS

---

- **Social Networking Platform** — [github.com/alihanbays/twitter-clone](https://github.com/alihanbays/twitter-clone): Full-stack real-time social media application with C#/.NET 8/ASP.NET Core featuring OAuth authentication, follower graph modeling with many-to-many relationships, dynamic feed aggregation, and RESTful API design. Optimized complex queries with Entity Framework Core for timeline rendering at scale.
- **Automated API Integration Service** — [github.com/alihanbays/Daily-LeetCode-Scraper](https://github.com/alihanbays/Daily-LeetCode-Scraper): Python-based automated service integrating external REST APIs with Microsoft Teams webhooks for real-time notifications, deployed on Linux with cron scheduling for reliable daily execution. Demonstrates API integration, error handling, and operational automation patterns.
- **Real-Time Systems Engine** — [github.com/alihanbays/SDL3-Pong](https://github.com/alihanbays/SDL3-Pong): High-performance application built with C++ and SDL3 implementing real-time event loop architecture, collision detection algorithms, and frame-rate independent rendering. Demonstrates low-level systems programming, memory management, and performance optimization.

## TECHNICAL SKILLS

---

- **Languages:** Python, C#, TypeScript, JavaScript, SQL, C++
- **Cloud & Infrastructure:** AWS (Lambda, API Gateway, S3, RDS, SQS, CloudWatch, Glue, DMS), Docker, CI/CD Pipelines
- **Backend & Architecture:** .NET Core 8, ASP.NET Core, Entity Framework Core, RESTful APIs, Event-Driven Architecture, Microservices, Message Queues (ActiveMQ/SQS), OAuth2.0, Vue.js 3, PostgreSQL
- **Certifications:** AWS Certified AI Practitioner, AWS Certified Cloud Practitioner
